Dr. Báez has published DVD tutorials in the Implant field, has a Master Degree in digital cinema and has integrated it with many dental disciplines and concepts in orthodontics, esthetics, implantology, prosthodontics and restorative to get optimal results.

This Course is for you if:

- You want to achieve highly predictable implant and mini implant success in every case
- You need more confidence in using implants
- Your Implant or mini implant kit is collecting dust on your shelf without being used
- You want to develop a profit center within your practice and dramatically increase your bottom line
- You want to capture the baby boomers implant and denture market converting your Denture Cases into Implant Cases
- You had minimal success with mini implants and want to improve your success rate as well as avoid complications
- You want to add new challenge and revitalized your practice

Attendees will learn:

- Hands-on session
- 2 Critical factors for Implant success
- Extensive review of basic Implant Protocol
- Fixed applications & guidelines
- Cases you must avoid
- Diagnosis and treatment planning
- Bone Classification & management
- Fracture prevention & management
- Deciding when to load or when to leave
- Medical Considerations
- Esthetic Principles
- Evaluation of force/load
- One piece or two piece system?
- Rules for Immediate Load
- Things you **MUST** know before treating maxilla cases
- Live Video Tutorial
- Handling patients on Biphosphonates
- Failure management
- Case studies & patient rounds
- Fees and how to increase profit

Course Objectives

- The objective of this course will be to provide thorough and detailed instructions on the Placement of Dental Implants, covering all aspects of Implant dentistry, in order to increase the success rate and clinical predictability of Implant procedures. This course will strive to help participating dentists become more confident & competent in performing Implant procedures.
